### PROTECT WATER LINES FROM FREEZING

The following actions should be considered to protect your water lines.

1. Repair broken windows and ensure windows/vents are closed during the winter.
2. Insulate water pipes in unheated areas, include crawl spaces.
3. For sinks located against a non-insulated outside wall:
  - Open the vanity door to allow warm air to reach the water pipes.
  - A light bulb placed near the water pipe may generate enough heat to keep the water flowing.
  - Heat tape wrapped around the pipe may keep the pipe from freezing.
4. For Residents of mobile homes
  - check the condition of the heat tape on their water service and meter
  - protect unheated indoor water meter with an insulated box
  - water pipes should be wrapped in insulation using heat tape
  - Outside water taps and underground sprinkler systems should have the water supply shut off inside the house at the isolation valve for the tap
  - Sprinkler lines and taps should be drained/blown out
5. A thin stream of water (as thick as a pencil lead) running continuously from at least one tap will help prevent a frozen water service.
6. If you plan to be away from home over the winter period, close the main water isolation valve in your home. This is located next to your water meter.

A frozen water service, or a burst water pipe, is an inconvenience and expense that most people would like to avoid. Please take precautions to prevent this happening in your home or business.

### FIRE HYDRANT & WATER MAIN FLUSHING

Environmental Utilities performs regular maintenance to maintain water quality and system infrastructure by annually testing and flushing fire hydrants and water mains.

During flushing there may be some discoloring of water which is not harmful and will disappear when flushing is complete. Fluctuating pressure may also be noticed. Should discoloration persist beyond three hours, turn on your cold water tap and let the water run for 15-20 minutes. Please note that the flushing in your home will not correct private plumbing/corrosion problems.
