

RIVER FLATS SINKHOLE STUDY

(2013 SOUTH SASKATCHEWAN RIVER FLOOD)

BACKGROUND

- A number of residences in the River Flats experienced sinkholes during the 2013 flood
- Due to public safety and re-occupation concerns, City conducted a geotechnical investigation to determine if there was a larger sinkhole concern across the area and to determine the potential cause and future appearance of sinkholes
- Appeared to be a sinkhole location pattern
- Project was completed between August and October 2013
