Commercial Solid Waste Collection Service

The Solid Waste Utility offers waste collection services to commercial, industrial and institutional businesses within the city. To help us provide you with safe, efficient and environmentally sound solid waste collection services, the Environmental Utilities Department requests that commercial account customers follow the collection guidelines as outlined.

- City of Medicine Hat commercial bins are side-load only.
- Minimum collection level is one pickup per week. Collection frequency can range up to five days per week.
- The minimum service period is four months. If service is discontinued prior to four months, accounts will be charged a fee for bin removal.
- Requests for additional pickup will be billed to the utility account as a separate charge.
- Do not place items such as boxes, pallets, other debris or excess garbage around or on top of commercial containers. Additional material should be held until your next collection day.
- Appliances, furniture, tires, batteries, paint, hazardous liquids and materials, medical waste etc. is **NOT** accepted for collection. Contaminated containers may be refused service or charged a fee for load contamination.
- Keep container lids closed at all times to avoid any debris blowing out and to contain odours. Please do not overload to the extent that the lid cannot close.
- If the collection container is locked or enclosed by a gate, please have the container accessible **by 6 a.m. on collection day**. If access is unavailable or blocked, the container will not be collected as scheduled.
- If a solid waste operator is required to unlock a container or gate, accounts will be billed a fee as determined by the Solid Waste Utility at time of initial site inspection.
- Service collection that falls on a recognized holiday may occur the day before or after the regular scheduled collection day.
- Container cleaning and maintenance is the account holder's responsibility.

For more information regarding Commercial Solid Waste Collection, please contact the Environmental Utilities Department at 403.529.8176.
