INTRODUCTION

1

Background and Objectives

This report presents the findings of the City of Medicine Hat's 2022 Community Survey. This is the first Community Survey conducted by the City of Medicine Hat. It is intended to provide a baseline measure of community sentiment around a variety of topics and will be repeated every two years to monitor how perceptions are changing.

Key research topics include:

- Quality of life
- Important local issues
- Importance of and satisfaction with City services
- Value for taxes and balancing taxation and service delivery levels
- Communications and customer service
- Council, Administration, and municipal operations

Insight gained by this research will help the City of Medicine Hat make important decisions regarding planning, budgeting, and service improvements.

Methodology

Ipsos conducted both a **telephone** survey and an **online** survey.

Telephone Survey

- The telephone survey provides a random and representative sampling of community opinions.
- A total of 400 adult (18+ years) Medicine Hat residents were interviewed by telephone between May 4 and 22, 2022.
- Interviewing was conducted on both cellphones (70%) and landlines (30%). A screening question was included at the start of the survey to confirm residency in Medicine Hat.
- Households with members who work for the City and/or with elected officials of the City were excluded from the survey.
- The final data has been weighted to ensure that the gender/age distribution reflects that of the actual population in Medicine Hat according to 2021 Canadian Census data.
- Overall results are accurate to within ± 4.9 percentage points, nineteen times out of twenty. The margin of error will be larger for sample subgroups.

Interpreting and Viewing the Results

Some totals in the report may not add to 100%. Some summary statistics (e.g., total satisfied) may not match their component parts. The numbers are correct, and the apparent errors are due to rounding.

Analysis of some of the statistically significant demographic results is included where applicable. While a number of significant differences may appear in the cross-tabulation output, not all differences warrant discussion.

Where possible, the City of Medicine Hat's results have been compared to Ipsos' database of municipal norms. These norms are based on research Ipsos has conducted in other Canadian municipalities within the past five years. Normative comparisons provide additional insight, context, and benchmarks against which the City of Medicine Hat can evaluate its performance.

Methodology

Online Survey

- The online survey gave all residents an opportunity to provide their feedback. The focus on inclusiveness means that residents self-selected whether to take part or not, and the results should not be considered as representative of the population as a whole. The City was responsible for promoting the online survey to the community.
- While the online survey asked respondents the same screening questions as the telephone survey, all online respondents were allowed to continue regardless of their responses. A maximum of 3 surveys per IP address were accepted.
- In total, 298 respondents completed the online survey between May 5 and 25, 2022. After removing the surveys that exceeded the IP address limit, the final online sample size is 283, including:
 - 245 respondents who meet the same qualifying criteria as the telephone survey (Medicine Hat residents who are 18+ years of age and do not live in households with members who work for the City and/or elected officials with the City)
 - 23 respondents with a City staff member and/or elected official in the household (including 1 non-resident)
 - 7 non-residents of Medicine Hat (including 1 with a City staff member and/or elected official in the household)
 - 9 respondents who cannot be classified into one of these groups due to their refusal to answer the upfront screening questions
- **The online results shown in this report are based on the 245 respondents who meet the same qualifying criteria as the telephone survey.** Results for households with City staff/elected officials and non-residents can be found in the detailed tables for the online survey under a separate cover.
- No weighting was applied to the online data and no margin of error is applicable.

TELEPHONE SURVEY RESULTS

2

EXECUTIVE SUMMARY

Executive Summary

Quality of Life

Perceptions of overall quality of life are strong.

Half feel the quality of life has stayed the same over the past three years. Those noticing a change are more negative than positive.

The likelihood of recommending Medicine Hat as a place to live is high.

- Nearly all (95%) citizens rate the overall quality of life in Medicine Hat as 'very good' (36%) or 'good' (58%). Perceptions of overall quality of life in Medicine Hat are on par with the municipal norm.
 - Overall perceptions (combined 'very good/good' responses) are higher among those who are 55+ years of age (98% vs. 91% of 18-34 years, 92% of 35-54 years), homeowners (98% vs. 85% of renters), and those living in households without children under the age of 18 (96% vs. 90% of those with children at home).
- Half (51%) say the quality of life in Medicine Hat has 'stayed the same' over the past three years. Another 37% say 'worsened' and 11% say 'improved', yielding a net momentum score of minus 26. In comparison, the municipal norm net score is minus 13.
 - Perceptions of a 'worsened' quality of life are higher among those who are 35-54 years of age (50% vs. 30% of 18-34 years, 32% of 55+ years) and those living south of the river and north of Seven Persons Creek (45% vs. 29% of south of the highway, 39% of north of the river, 40% of south of Seven Persons Creek and north of the highway).
- Those saying the quality of life has 'improved' attribute this to a variety of factors, including "more activities/ things to do" (17% coded open-ends), "economic development/more local businesses" (13%), "good amenities/services (unspecified)" (12%), and "City leadership/governance (includes mentions of Mayor and Council)" (11%).
- The main reasons for saying the quality of life has 'worsened' are "COVID-19" (29% coded open-ends) and "it is more expensive/cost of living" (27%).
- Overall, 91% of citizens say they are likely to recommend Medicine Hat as a place to live, including 29% 'definitely would', 29% 'very likely', and 33% 'somewhat likely'.
 - The overall likelihood to recommend (combined 'definitely/very/somewhat likely' responses) is higher among those who are 55+ years of age (95% vs. 84% of 18-34 years, 89% of 35-54 years).

Executive Summary

Important Local Issues

Municipal government services, social issues, and the economy are the top three local issues.

- When asked to identify important community issues on an open-ended basis, 21% of citizens mention municipal government services, 20% mention social issues, and 17% mention the economy.
 - **Municipal government services** is mainly comprised of mentions related to “utilities costs” (15%), as well as “infrastructure (unspecified)” (4%), “city cleanliness” (1%), “garbage/recycling” (1%), and “other municipal government services mentions” (2%). Mentions of municipal government services in Medicine Hat are double the municipal norm.
 - Municipal government services are more likely to be mentioned by those who are 35+ years of age (includes 25% of 55+ years and 24% of 35-54 years vs. 10% of 18-34 years), those living south of Seven Persons Creek and north of the highway (30% vs. 11% of south of the highway, 15% of south of the river and north of Seven Persons Creek, 23% of north of the river), and homeowners (25% vs. 12% of renters).
 - **Social issues** includes mentions of “drug abuse/addiction” (7%), “poverty/homelessness” (7%), “housing/lack of affordable housing” (4%), “seniors’ issues” (1%), and “other social mentions” (3%). While social issues are one of the top issues in Medicine Hat, mentions are still below the municipal norm, where it sits atop the public issue agenda.
 - Social issues are more likely to be mentioned by women (24% vs. 15% of men), younger residents (26% of 18-34 years vs. 15% of 55+ years, 21% of 35-54 years), and those who have lived in Medicine Hat for 11-20 years (26% vs. 16% of 21+ years, 23% of 10 years or less).
 - **Economy** includes mentions of “cost of living” (7%), “economic development” (4%), “employment/job creation” (4%), and “other economy mentions” (3%). The emphasis placed on the economy in Medicine Hat is higher than the municipal norm.
 - Mentions of the economy are statistically consistent across all key demographic segments.

Executive Summary

City Services

Overall satisfaction with City services is high.

Satisfaction extends to the delivery of specific services.

- Nine-in-ten (90%) citizens say they are satisfied with the overall level and quality of services provided by the City of Medicine Hat. This includes 31% saying 'very satisfied' and 59% saying 'somewhat satisfied'. Overall satisfaction with municipal services in Medicine Hat is on par with the municipal norm.
 - Satisfaction (combined 'very/somewhat satisfied' responses) is higher among those who are 55+ years of age (94% vs. 85% of 18-34 years, 88% of 35-54 years) and those living in households without children under the age of 18 (92% vs. 85% of those with children at home).
- Of the evaluated services, satisfaction is highest for *garbage and recycling services (96%)* and *parks, trails, and other green space (96%)*.
- A strong majority also say they are satisfied with *recreational facilities and programs (84%)*, *maintenance, cleaning, and upgrading of streets and sidewalks (83%)*, *cultural and entertainment facilities and programs (82%)*, and *bylaw enforcement (82%)*.
- The three services scoring relatively lower are *communication with residents (76%)*, *traffic management and improving the flow of traffic (73%)*, and *public transit (67%)*.
 - Satisfaction with *public transit* is statistically similar among public transit users (63%) and non-users (68%).
- Medicine Hat residents' satisfaction with several services is higher than the municipal norm. These include *garbage and recycling services, maintenance, cleaning, and upgrading of streets and sidewalks, bylaw enforcement, and traffic management and improving the flow of traffic*.
- Conversely, satisfaction with *communication with residents* and *public transit* in Medicine Hat is lower than average.

Executive Summary

City Services (cont.)

All the evaluated services are important to citizens.

- The most important (combined 'very/somewhat important' responses) services are *maintenance, cleaning, and upgrading of streets and sidewalks (96%), garbage and recycling services (95%), parks, trails, and other green space (94%), recreational facilities and programs (90%), and communication with residents (90%)*.
- Other highly important services are *traffic management and improving the flow of traffic (86%), bylaw enforcement (85%), and cultural and entertainment facilities and programs (82%)*.
- *Public transit* is rated comparatively lower (66%), although is still important to two-thirds of residents.
 - Importance rises to 93% among public transit users (vs. 62% of non-users).
- Compared to the municipal norm, Medicine Hat residents place less emphasis on *traffic management and improving the flow of traffic* and *public transit*. The importance of all other services is consistent with the norm.

Executive Summary

Financial Planning

Most citizens say they receive good value for their municipal tax dollars.

Opinion is split on balancing taxation and service delivery levels.

- Overall, 78% of citizens say they receive good value for their municipal tax dollars. This includes 19% saying 'very good value' and 59% saying 'fairly good value'. Medicine Hat residents' perceptions of their value for taxes are on par with the municipal norm.
 - Overall perceptions (combined 'very/fairly good value' responses) are higher among those who are 55+ years of age (83% vs. 72% of 35-54 years, 77% of 18-34 years).
 - Those who have lived in Medicine Hat for 11-20 years are *less* likely to say they receive good value for their municipal tax dollars (68% vs. 89% of 10 years or less, 80% of 21+ years).
- When given the choice between increased taxes or cut services, 45% of citizens opt for tax increases while 42% say they would prefer service cuts. Specifically, 16% say 'increase taxes to enhance or expand services' and 29% say 'increase taxes to maintain services at current levels' compared to 26% saying 'cut services to maintain current tax level' and 16% saying 'cut services to reduce taxes'. This is different from the municipal norm, which shows a clear preference for tax increases over service cuts.
 - Attitudes towards balancing taxation and service delivery levels are statistically consistent across all key demographic segments.

Executive Summary

Communications and Customer Service

City finances and community planning are the most requested types of information.

Citizens are interested in receiving information from the City via a variety of methods, with email the most preferred channel overall.

- On an unprompted basis, citizens say they are the most interested in receiving municipal information regarding “City taxes/property taxes/budget” (20%) and “community planning/land use/new developments” (11%). Notably, nearly four-in-ten (37%) indicate they have no immediate information needs, with 30% saying “none/nothing” and 7% saying “don’t know”.
 - Mentions of “City taxes/property taxes/budget” are higher among those who are 35-54 years of age (26% vs. 12% of 18-34 years, 19% of 55+ years) and homeowners (22% vs. 12% of renters).
- “Email” is the most preferred way of receiving City information, garnering 30% of mentions on an unprompted basis. The overall preference for email communications is consistent with the municipal norm.
- Other preferred communication channels include “social media (Twitter, Facebook, etc.)” (20%), “newspaper” (17%), “City website” (14%), “radio” (14%), “TV” (12%), “mail” (10%), and “newsletter/pamphlet/flyer/brochure” (10%).
- Communication preferences vary by age. For example:
 - Those <55 years are more likely to mention “email” (includes 37% of 35-54 years and 33% of 18-34 years vs. 24% of 55+ years) and “social media” (includes 34% of 35-54 years and 24% of 18-34 years vs. 9% of 55+ years).
 - Conversely, older citizens are more likely to mention “newspaper” (32% of 55+ years vs. 2% of 18-34 years, 8% of 35-54 years) and “TV” (18% of 55+ years vs. 7% of 18-34 years, 8% of 35-54 years).
 - Mentions of “City website” are higher among those who are 35+ years of age (includes 18% of 35-54 years and 17% of 55+ years vs. 6% of 18-34 years).

Executive Summary

Communications and Customer Service (cont.)

More than four-in-ten say they have contacted or dealt with the City of Medicine Hat in the last 12 months.

Satisfaction with the City's customer service is high.

- Overall, 43% of citizens say they have personally contacted or dealt with the City of Medicine Hat or one of its employees in the last 12 months. This is lower than the municipal norm; however, this difference may be at least partly attributable to COVID-19, which generally provided fewer opportunities for social interaction over the past year.
 - Claimed contact is higher among those who are 35-54 years of age (51% vs. 36% of 18-34 years, 40% of 55+ years) and those living south of Seven Persons Creek and north of the highway (50% vs. 32% of south of the highway, 43% of north of the river, 45% of south of the river and north of Seven Persons Creek).
- A strong majority (85%) of those who contacted or dealt with the City in the last 12 months say they are satisfied (combined 'very/somewhat satisfied' responses) with *the overall service received*.
- Satisfaction extends to specific elements of the City's customer service, including:
 - 95% satisfied with *staff's courteousness*
 - 90% satisfied with *staff's helpfulness*
 - 89% satisfied with *staff's knowledge*
 - 85% satisfied with *the speed and timeliness of service*
 - 84% satisfied with *the ease of reaching staff*
 - 82% satisfied with *staff's ability to resolve your issue*
- Satisfaction with the City of Medicine Hat's customer service is consistent with the municipal norm.

Executive Summary

Perceptions of Council, Administration, and Municipal Operations

Most are satisfied with the performance of Council and Administration.

Perceptions of municipal operations are favourable, particularly when it comes to inclusivity, accountability, and openness.

Perceptions around the City's public engagement and spending are comparatively lower but still positive overall.

- Overall, 81% of citizens say they are satisfied (combined 'very/somewhat satisfied' responses) with the way the City of Medicine Hat's *municipal government, including Council and Administration as a whole* is running the community, on par with the municipal norm.
 - Overall satisfaction is higher among those who are 55+ years of age (88% vs. 73% of 35-54 years, 77% of 18-34 years) and those living south of Seven Persons Creek and north of the highway as well as those living south of the highway (86% and 85% vs. 70% of south of the river and north of Seven Persons Creek, 77% of north of the river).
- Satisfaction with *Administration, excluding Council* (78%) and *Council, excluding Administration* (77%) is similar. Medicine Hat residents' satisfaction with *Council* is higher than the municipal norm.
- When it comes to perceptions of municipal operations, citizens are most likely to agree (combined 'strongly/somewhat agree' responses) that *the City fosters a community that is inclusive and accepting of all* (81%), *the City is accountable to the community for leadership and good governance* (77%), and *the City practices open and accessible government* (76%).
- Comparatively fewer (but still the majority) agree that *the City uses input from citizens in decision-making about City projects and services* (69%), *the City provides citizens with opportunities to have meaningful input into decision-making* (67%), and *the City does the best it can with the money available* (63%).
- Medicine Hat residents' perceptions of municipal operations are largely on par with the municipal norm. The one exception is around spending (*the City does the best it can with the money available*), where agreement in Medicine Hat is lower than average.

Survey Highlights

Key survey measures are largely positive.

1

- Overall Quality of Life: 95% good
- Likelihood to Recommend: 91% likely
- Overall Satisfaction with City Services: 90% satisfied
- Value for Taxes: 78% good value
- Satisfaction with Municipal Government as a Whole: 81% satisfied

2

While overall perceptions of quality of life are high, COVID-19 and the cost of living are making more see quality of life worsening versus improving.

3

Municipal government services (particularly utilities costs), social issues, and the economy lead the public issue agenda.

4

Communication with residents could be improved. Specific opportunities include but are not limited to:

- Providing more information on City finances and community planning
- Ensuring communications are conducted via the preferred channels, including email when possible
- Improving the public engagement process by offering more opportunities for input and explaining how the feedback will be used, including any other factors or considerations that play a role in shaping final decisions

5

Satisfaction with the City's customer service is high, with staff courteousness standing out as a service highlight.

6

Opinion is split on balancing taxation and service delivery levels.

APPENDIX: ONLINE SURVEY RESULTS

3

Summary

COMPARISON OF ONLINE TO TELEPHONE

Overall, the results of the online survey generally align with the telephone survey in terms of direction, with online respondents echoing many similar sentiments and themes as those who participated in the telephone survey.

However, online respondents tend to provide lower ratings than telephone respondents for most survey measures.

There are a few instances where the online and telephone results are notably different. These include:

- **Change in Quality of Life:** a majority of online respondents say the quality of life in Medicine Hat has 'worsened' over the past three years, while telephone respondents are more likely to say the quality of life has 'stayed the same'. Both, however, report negative net scores overall.
- **Reasons Quality of Life has Worsened:** while the cost of living is a factor for both online and telephone, online respondents who feel the quality of life has worsened also voice concerns around crime and City leadership. Conversely, telephone respondents are more likely to mention COVID-19.
- **Satisfaction with City Services:** only one-third of online respondents say they are satisfied with *public transit*, compared to two-thirds of telephone respondents. Online respondents are more likely than telephone respondents to say they 'don't know' how to evaluate this service.
- **Preferred Methods of Communication:** online respondents place an equal emphasis on social media and email communications, while telephone respondents prefer email over all others.
- **Contact with the City:** nearly two-thirds of online respondents say they have personally contacted or dealt with the City in the last 12 months, compared to less than half of telephone respondents.
- **Satisfaction with Council and Administration:** online respondents are more satisfied with Council than Administration. This is different from the telephone survey, where satisfaction is similar for both Council and Administration.
- **Agreement with Statements about City of Medicine Hat:** while a majority of telephone respondents agree with all the evaluated statements, only a minority of online respondents agree that the City practices open and accessible government, provides citizens with meaningful opportunities for input, uses citizens' input in decision-making, and does the best it can with the money available.

Reasons Quality of Life Has Improved

AMONG THOSE SAYING THE QUALITY OF LIFE HAS IMPROVED (CODED OPEN-ENDS)

Only 16 online respondents say the quality of life has 'improved' over the past three years. This sample size is too small for coding. Instead, the verbatim comments explaining why they feel the quality of life has 'improved' have been included below.

Because they're getting more and more educated.

So many new restaurants and businesses.

New Mayor and City Council.

More things to do. New restaurants. New business.

Improvement to local Arts and Culture.

Growing at a good pace.

Increased construction building has increased offerings to the city.

Elected council who cares about the citizens, not only big business.

I've been a resident for 45 years and every year there's not much to complain about, we have it really good!

Corrupt officials gone.

Calmer.

Don't know.

Community connection programs.

More business in the north.

Increased attention to wellness and livability.

Until the new council, no tax increases, stayed out of health issues, steady progress on gentle growth.

Game Changers

In our world of rapid change, the need for reliable information to make confident decisions has never been greater.

At Ipsos we believe our clients need more than a data supplier, they need a partner who can produce accurate and relevant information and turn it into actionable truth.

This is why our passionately curious experts not only provide the most precise measurement, but shape it to provide True Understanding of Society, Markets and People.

To do this we use the best of science, technology and know-how and apply the principles of security, simplicity, speed and substance to everything we do.

So that our clients can act faster, smarter and bolder. Ultimately, success comes down to a simple truth:

You act better when you are sure.
